

Guide

SPINNING

Spinning will cost 1x of spins	
1x :	Always Available
1x - 3x :	You need less than 200 spins total
5x :	You need 201-499 Spins Total
8x :	You need 500-999 Spins Total
10x :	You need 1000-2799 Spins Total
25x :	You need 2800-4999 Spins Total
50x :	You need 2800-4999 Spins Total
<p>Spins are generated with 5 spins each hour until it reaches its maximum of 50 spins, then it stops. Meaning that it takes 10 hours to complete.</p> <p>HINT:Let spins refill to at least 25 spins before playing again.</p> <p>When spinning you will want to get 3 of the same symbols to get the best rewards.</p>	
3 shields :	Give you 1-50 shields depending on how much you bet.
3 coins :	Give more coins. How much depends on what village level you are at. The higher the number the more coins. However, village upgrades also increase at higher levels.
3 coin pouches :	Yield the highest amount of coins. How much depends on the village number.
3 energy :	capsules give 10 spins times betting

3 hammers : let you attack other players and damage their village.

3 pigs : Let you raid your "Coin Master" that is displayed on top of the slot machine. This is a friend, a random player or bot with the most coins.

Attacking / Raiding

Attacking: gives you the option to damage somebody's village. You can choose to attack a friend or random player

Your attack can be blocked if a player has a **shield** or a **Rhino** Activated. This will give you Less coins than a successful attack. There are no real strategies in attacking. You more likely to damage a villiage that was burning objects. (Helps on Events) Knowing which is going to shield or not.

Raiding: is a feature that gives you the option to steal other players's coins. This is often a friend, but it could also be a random player or bot(robot). I have encountered many bots(robots) Good Sum of money.

In raiding, there are 4 holes and you have 3 shovels to dig 3 holes. One of them is empty or has a bonus chest. The other 3 are filled with coins and one of them 60-70% the other 2 have 15-20%

Foxy pet: can be used to steal more coins. It must be fed with a treat to be active. Foxy will dig the 4th hole resulting in more coins.

People can only raid a small number of your coins at a time. This varies depending on their star and village level. This is so you won't get bankrupt by one raid if you have a hundred of millions or billions of coins.

Most people play by made up rules about not raiding friends before asked of permission. You don't have to do that, but you will most likely get unfriended for "big-raiding" some people without telling them your about to raid them.

Two finger Trick: If you have dug 2 holes and both had coins in them, then try and tap the remaining 2 holes exactly the same time and hold for a second. The one

with coins will be dug and give you perfect raid.(you need to get your finger positioning perfect)

Place fingers in level with each other and tap really fast. (you will understand)

PETS

There are 3 pets that can be obtained. They have their own unique feature. You can only Activate them using Treats, 1 treat will activate pet for 4 hours. Treats are rewarded through events or randomly, by spinning and upgrading Village. They can also be bought with real money.

Pets can be leveled up by experience points (XP). They are obtained through events, Completing SETS and Spinning. They can also be bought with real money.

Foxy: Digs the 4th hole in a raid. Unlocks at reaching level 4.

Tiger: Gives attack rewards. Unlocks when completing beasts card SET.

Rhino: Blocks attacks. Unlocks when completing creatures card SET.

CARDS

Cards are collectibles that can be found by opening chests or completing steps in the Certain quest event. They can also be shared between friends but only normal cards. There's a limit of sending 5 cards per day. Gold cards can be sent on a golden trade event.

They can also be shared between friends but only normal cards. There's a limit of sending 5 cards per day. Gold cards can be sent on a golden trade event.

Gold cards can be sent on a golden trade event. On that Certain event, you can only send and receive 2 chosen cards that the game developers pick.

Cards are collected in sets and when a set is completed it gives you a reward in spins and sometimes in experience points.

Some cards are rarer than others meaning that there is a less chance of getting those cards. They also drop at specific villages or star Rating. [Card Search Page](#) , you will be able to find what level and star level you have to be to get them.

Villages

Coin Master leveling system consists of villages. Your village number is your Rank. To find out what number you are on, then look at the in-game map function.

Villages come in different themes. There are five objects that can be upgraded using coins you earn by playing/Spinning.

These objects can be damaged by other players if they attack you , thats if you don't have any shields or Rhino pet activated. When an object is attacked, it will cost half the price of the previous upgrade to repair.
If it is damaged two times in a row, you will have to pay full price to upgrade again.

Tips and Tricks

If you want to Send more than 5 cards per day. Change the phone's date in settings 1 day forward.

Feeding Pet:	Feeding Pet: When you feed a pet and are done using/playing, select a different pet. And that timer will stop and the pet will stay active.
---------------------	---

Rare cards	To Get more rare cards Some people will give away free rare cards on Facebook groups. Once you get one you will start getting more of the same easier when opening new chests. Any extra ones you get you can trade for new rare cards.
-------------------	---

Super betting:	If you get super bet enabled and never go under 5 spins. You will keep super betting at 5x as long as you don't go under.
-----------------------	---

To complete more sets and win more spins, in my best opinion is to buy chests for at least 1 billion on each level to village 50 after that, you then should buy for at least: 2 billion to make sure to get most cards that can be found on each level. Also, try to save to 7-10k spins so you can bet x50 when spinning.(Obviously in Events)

When spinning, try to learn the patterns and don't bet x50 every time. Also when you feel that you are about to lose more spins than you win. Just stop and wait for the next event.

Only buy chests on cards boom event. At least that is what I do and it's working out for me. You can check out my card finds here: [Card Search](#)

It's also good to have a lot of friends to raid. The more friends you have, the more coins you will win.(downfall is if someone don't like you they will destroy your villiage)

Do this and you will become a "Coin Master Pro".

Tricks to do when buying chests

This is my favorite trick. Look at the last card in the chest and count the stars. If it has 1-2 stars buy a wooden chest, if 3 buy gold chest and 4-5 buy a magical chest . Do this and you will get more new cards. If you have spent Few 100 Million on cards, I would recommend moving to the next level. Just

Trick 1: make sure there aren't any rare cards left to find.(Gold)

Start off with buying wooden chests and buy until the last card is 3 stars or more. Then move on to the golden chest and continue buying until the last card is 4 stars or golden. Then start buying magical chests until the last card

Trick 2: is golden. After this step Rinse/Repeat.

Trick 3: Buy 20 chests of each type. Example: 20 wooden, 20 gold and 20 magical.

When reaching a new level buy some chests no result. Then upgrade your

Trick 4: village by 1 star each item, Then start buying chests Continue.
